

World Data Deck Cards

Each card contains the following information:

1. State of the world: Look, feel, atmosphere, weather, etc.
2. No. of samples found of what plant.
3. State of Rafflesia plant.

1. WD1:

A sunny day. The Rafflesia has been dormant for the past couple of days. No significant activity recorded.

You find 3 samples of Foundation Species 2 today.

2. WD2

A cloudy day. The Rafflesia bud is dormant. No significant activity recorded.

You find 2 samples of Foundation Species 3 today.

3. WD3

A cloudy day. The black bud is becoming visible from a distance. Rafflesia is dormant. No significant activity recorded.

You find 1 sample of Foundation Species 3 today.

4. WD4

A foggy day. The black bud starts to grow larger.

You find 1 sample of Foundation Species 4 today.

5. WD5

A sunny day. There is significant increase in the size and activity of the Rafflesia bud. It may be nearing it's blooming stage.

You find 1 sample of Foundation Species 4 today.

6. WD6

A cloudy day. The Rafflesia bud seems slightly larger than yesterday.

You find 2 samples of Foundation Species 3 today.

7. WD7

A foggy day. The Rafflesia bud appears larger than ever. The surviving plants around it all look weak. The Rafflesia is stronger than previously anticipated. Though it's been surviving by siphoning the energy from surrounding life forms, it seems to be maturing faster than expected.

You find 1 sample of Foundation Species 4 today.

8. WD8

A rainy day. The Rafflesia bud is now large enough to eclipse the sunrise. The air is thick. The garden plants are unable to fight back. They are withering and dying.

You find 1 sample of Foundation Species 5 today.

9. WD9

A cloudy day. The air seems heavier than usual, but it doesn't affect you that much. The black Rafflesia bud petals appear to be fully developed.

You find 2 samples of Foundation Species 3 today.

10. WD10

A rainy day. The air is very difficult to breathe in. The Rafflesia bud petals show signs of opening.

You find 1 sample of Foundation Species 5 today.

11. WD11

A foggy day. The air feels heavier due to the thickening atmosphere. The Rafflesia bud is mature, the petals seem like they're about to open any day now.

You find 2 samples of Foundation Species 4 today.

12. WD12

A rainy day. The air is filled with miasma. The Rafflesia starts blooming.

You find 2 samples of Foundation Species 5 today.

Mother Audio Log Cards Deck

Each Card gives some information:

1. Some background story information.
2. Every few cards reminds the player to go outside and collect samples from the world.

1. MAL1:

- a. You stayed in and tended to the Terrarium while listening to your mother's audio log.
- b. +1 Health to all existing Foundation Species in the Terrarium.
- c. Day 322:
- d. Time 16: 53
- e. "The sample I collected yesterday wasn't sufficient. I'll have to go out and grab some more samples of the species."

2. MAL2:

- a. You stayed in and tended to the Terrarium while listening to your mother's audio log.

- b. +1 Health to all existing Foundation Species in the Terrarium.
 - c.
 - d. Day 323:
 - e. Time 17: 45
 - f. “The Terrarium experiment is coming along! The Foundation Species are growing while simultaneously aiding in the growth of the plants surrounding them. This proves that the Foundation Species are the key to creating and sustaining the environment they exist in.”
3. MAL3:
- a. You stayed in and tended to the Terrarium while listening to your mother’s audio log.
 - b. +1 Health to all existing Foundation Species in the Terrarium.
 - c. Day 324:
 - d. Time 16: 47
 - e. “It seems like some Foundation Species are more potent than other Foundation Species. Maybe I’ll need more or less of a certain species to create a balance in my Terrarium experiment.
4. MAL4:
- a. You stayed in and tended to the Terrarium while listening to your mother’s audio log.
 - b. +1 Health to all existing Foundation Species in the Terrarium.
 - c. Day 325:
 - d. Time 17: 36
 - e. I found out today that Foundation Species 4 and 5 are more potent than Foundation Species 1, 2, and 3. Based on the intensity of their potency, I only need 3 samples of Foundation Species 4, and 2 of Foundation Species 5 in order to create harmonious resonance in the Terrarium.
5. MAL5:
- a. You stayed in and tended to the Terrarium while listening to your mother’s audio log.
 - b. +1 Health to all existing Foundation Species in the Terrarium.
 - c. Day 326:
 - d. Time 17: 21

- e. The samples in the Terrarium seem to be doing well. I should collect more samples while the weather is fair. Alfie wants to come with me on one of my surveys! I'm excited to see him show interest in my work.
6. MAL6:
- a. You stayed in and tended to the Terrarium while listening to your mother's audio log.
 - b. +1 Health to all existing Foundation Species in the Terrarium.
 - c. Day 327:
 - d. Time 15: 17
 - e. I found out more about the parasitic Rafflesia that invaded the environment. Apparently they thrive off the nutrients of another plant in order to survive. This invasive species could threaten the very balance and existence of the environment.
7. MAL7:
- a. You stayed in and tended to the Terrarium while listening to your mother's audio log.
 - b. +1 Health to all existing Foundation Species in the Terrarium.
 - c. Day 328:
 - d. Time 19: 13
 - e. Alfie mentioned that all the samples I found for Foundation Species 3 have been on cloudy days. Maybe certain Foundation Species thrive in certain weather conditions? And was Alfie always this observant??
8. MAL8:
- a. You stayed in and tended to the Terrarium while listening to your mother's audio log.
 - b. +1 Health to all existing Foundation Species in the Terrarium.
 - c. Day 329:
 - d. Time 19: 37
 - e. The samples in the Terrarium seem to be doing well. I should collect more samples while the weather is fair. It made me so happy to hear Alfie say they want to help take care of the Terrarium while I'm out collecting samples. I told them they can help me when they're older
9. MAL9:

- a. You stayed in and tended to the Terrarium while listening to your mother's audio log.
- b. +1 Health to all existing Foundation Species in the Terrarium.

- c. Day 330:
- d. Time 18: 41
- e. The weather is unstable these days, I wonder what's causing it to fluctuate so much? Regardless, I still need to collect more of Foundation Species 4 and 5.

10. MAL10:

- a. You stayed in and tended to the Terrarium while listening to your mother's audio log.
- b. +1 Health to all existing Foundation Species in the Terrarium.

- c. Day 331:
- d. Time 19: 43
- e. I finally found a rare Foundation Species 5! This was so difficult to find, but I did it! I showed Alfie who was super excited to see the glowing plant.

11. MAL11:

- a. You stayed in and tended to the Terrarium while listening to your mother's audio log.
- b. +1 Health to all existing Foundation Species in the Terrarium.

- c. Day 332:
- d. Time 20: 17
- e. The terrarium seems to be doing well, and the experiment is nearly completed! All the Foundation Species have been found, now I just have to- Alfie? Honey, what are you doing? Be careful sweetie don't stand too close to that- Alfie?! ALF- [audio log ends]

12. MAL12:

- a. You stayed in and tended to the Terrarium while listening to your mother's audio log.
- b. +1 Health to all existing Foundation Species in the Terrarium.

- c. Day 333:
- d. Time 21: 53
- e. "Alfie. It looks like mommy is going to go away now. If you're hearing this, please know that mommy loves you no matter what. It wasn't your fault. I love...[static].
